

- **Targeted Camera Positioning:**

The streaming or recording device must be positioned strictly to capture only the designated student and the RBT. Cameras must never scan the classroom or capture the faces or movements of peer students.

- **Acoustic Insulation Controls:**

The RBT must utilize unidirectional directional microphones or localized positioning to isolate session audio, ensuring surrounding student names or peer vocalizations are not captured or transmitted.

3. Administrative Emergency Override:

Classroom instructors, lead therapists, and facility administrators maintain an absolute, non-negotiable right to order the immediate termination or suspension of the electronic data stream at any second if unsolvable privacy concerns, classroom emergencies, or testing conditions arise.

4. BCBA Background Verification & Professional Standing:

The supervising BCBA verifies that they maintain active board certification in good standing, hold all necessary state-level professional licenses, and possess fully cleared criminal background checks and child abuse clearances on file with the primary behavior-analytic agency, matching the standard compliance criteria required of on-site personnel.
